Global and Split Fees

Both global and split fees apply to the breast and cervical procedures listed on this fee schedule. The method and direction of payment will determine their usage for your facility. The following are the codes and definitions that apply:

G = Global - the all-inclusive fee for performing and interpreting the service.

TC = Technical Component - the fee for performing the service.

26 = Professional Component - the fee for interpreting the service.

NOTES:

- (1) NC BCCCP covers only the physician's fee. Any facility charges associated with these CPT codes are not covered.
- (2) List separately in addition to code for primary procedure 77067.
- (3) List separately in addition to 77065 or 77066.
- (4) Bilateral ultrasound may be reimbursed at one and one-half times the unilateral rate (not double unilateral rate).
- (5) Codes 19081-19084 are to be used for breast biopsies that include image guidance, placement of localization device, and imaging of specimen. They should not be used in conjunction with 19281-19286.
- (6) Codes 19281-19286 are for image guidance placement of localization device without image-guided biopsy. These codes should not be used in conjunction with 19081-19084.
- (7) Not to exceed 3 base units plus time units (length of time spent providing anesthesia service in 15-minute increments) times conversion rate (\$21.63) or \$325, whichever is lower. Medicare's methodology for the payment of anesthesia services is outlined in chapter 12 of the Medicare Claims Processing Manual at:
<https://www.cms.gov/Regulations-and-Guidance/Guidance/Manuals/downloads/clm104c12.pdf>
The carrier-specific Medicare anesthesia conversion rates are available at:
<https://www.cms.gov/Center/Provider-Type/Anesthesiologists-Center>
- (8) Example: If procedure is 50 minutes, code 99156 + (99157 x 2). No separate charge allowed if procedure <10 minutes.
- (9) HPV DNA testing is not a reimbursable procedure if used as an adjunctive screening test to the Pap for women under 30 years of age.
- (10) All consultations should be billed through the standard "new patient" office visit CPT codes: 99201-99205. Consultations billed as 99204 or 99205 must meet the criteria for these codes, and must be pre-authorized. Codes 99204 and 99205 are typically not appropriate for NC BCCCP screening visits, but may be used when provider spends extra time to do a detailed risk assessment. BCCCP may pay for up to two surgical consultations.
