- Increase early detection of breast and cervical cancer among high-risk, under-served women.
- Expand community-based breast and cervical cancer screening and diagnostic services to low income, medically under-served women.
- Ensure access to medically appropriate services for women diagnosed with cancer or pre-cancer.

Objectives

- Increase the number of screening tests and follow-up of abnormal findings of breast and cervical cancers.
- Improve the screening knowledge, attitudes and practices regarding breast and cervical cancers among the general population in NC.
- Improve the clinical screening detection practices for breast and cervical cancers.
- Ensure optimal screening and diagnostic follow-up procedures.

1. Public and private non-profit agencies may apply and must be able to provide medical services in a facility capable of performing physical examinations, clinical breast exams (CBEs) and cervical cancer screenings.
2. Applicants must have a referral resource for mammograms and follow-up diagnostic services. Applicants must demonstrate ability to reach women ages 40 and older for NC BCCCP breast services and financially eligible women from 21 years to 64 years for cervical cancer screening services.
3. Applicants must demonstrate ability to document patient records, enter patient data into the State's integrated database and attend trainings as required.
4. Applicants must provide, by stated timeline guidance, patient tracking, patient navigation and follow-up of abnormal clinical breast examination, mammogram, and/or abnormal cervical cancer screening tests.

5. Applicants must designate a representative to oversee the clinical operations and serve as liaison (coordinator/navigator) with the NC BCCCP staff.
6. Applicants must be a licensed facility under the most recent Clinical Laboratory Improvement Amendments (CLIA) and Mammography Quality Standards Act (MQSA) regulations or contract with a licensed facility.

This RFA is targeting public and private non-profit agencies who shall offer the service to special populations (African Americans, Native Americans, Latinos) and the general public in accordance with CDC recommendations.

Local Health Departments are not eligible for this pool of funding.

FUNDING

The Cancer Prevention and Control Branch (Branch) receives federal funding from the Centers for Disease Control and Prevention (CDC) to carry out program activities for the NC BCCCP. Funding shall be available from a combination of federal and state dollars.

The Branch anticipates federal funding availability of \$664,275 and State funding availability of \$484,755 for continuation of NC BCCCP Screening Projects.

Each shall be funded annually for a thirty-six (36) month period, beginning June 1, 2019 to May 31, 2022.

The total funding available for each fiscal year shall be approximately \$ 1,149,030. The Branch anticipates awarding 10 - 17 BCCCP contracts with each contract ranging from \$30,000-\$185,000 annually.

Funding shall be available each year, contingent upon program performance and availability of funds. These funds do not include funding amounts allocated to applicants. Also, additional state and/or federal funds may be available based on annual funding allocations from the CDC and/or state legislature or specialty groups.

II. BACKGROUND

The goal of the North Carolina Breast and Cervical Cancer Control Program (NC BCCCP) is to reduce the morbidity and mortality due to breast and cervical cancers in North Carolina women by providing breast and cervical cancer screening and/or diagnostic services.

NC BCCCP funds Local Health Departments and community health agencies to establish and maintain a breast and cervical cancer screening program in their locales. There are 87 of 100 counties in North Carolina that have an active screening program that provides NC BCCCP services. NC BCCCP is designed as a screening/diagnostic program and does not provide funds for treatment. However, women enrolled in NC BCCCP prior to diagnosis may be eligible to receive Breast and Cervical Cancer Medicaid (BCCM) to cover acute treatment services for breast and cervical cancers, eligible precancerous breast and cervical lesions, and for reconstruction surgeries.

Breast cancer is the most common form of cancer in women aside from non-melanoma skin cancer in the U.S. It is the second leading cause of cancer deaths in Hispanic women, the third leading cause of cancer deaths among African-American and American Indian women, and the fourth leading cause of cancer deaths among White women in North Carolina (NC Central Cancer Registry). In 2018, an estimated 266,120 new cases of invasive breast cancer are expected to be diagnosed among U.S. women, as well as an estimated 63,960 additional cases of *in situ* breast cancer. Approximately 40,920 U.S. women are expected to die from breast cancer in 2018. (American Cancer Society (ACS) Cancer Facts & Figures 2018). Between 2012 and 2016, the NC incidence rate of breast cancer was 157.5 per 100,000 and the mortality rate was 20.8 per 100,000 women. In 2018, it is estimated that 10,625 women are expected to be diagnosed with breast cancer in NC with 1,429 deaths (NC Central Cancer Registry).

At one time, cervical cancer was a leading cause of cancer death for women in the U.S. However, since 1948, when the Pap test was introduced, the incidence and mortality of cervical cancer has decreased significantly. Between 2012 and 2016, the incidence rate from cervical cancer was 7.1 per 100,000 and the mortality rate was 2.1 per 100,000 in North Carolina. (NC Central Cancer Registry). Even though cervical cancer incidence and mortality continue to decrease significantly overall, the rates are considerably higher among African-American women. In 2018, an estimated 13,240 new cases of cervical cancer are expected to be diagnosed among U.S. women (ACS Cancer Facts & Figures 2018). An estimated 407 women are expected to be diagnosed in NC with an estimated 128 deaths in 2018 (NC Central Cancer Registry).

The most recent available data (Small Area Health Insurance Estimates, 2016) shows 135,742 women eligible for breast cancer screening and diagnostic follow-up and 300,966 women eligible for cervical cancer screening and diagnostic follow-up in the North Carolina BCCCP.

Comparison Data:

North Carolina Breast and Cervical Cancer Control Program (US State Cancer Profiles – 2018)

Breast cancer incidence rate was 131.0 per 100,000 women (*In situ* excluded)

Breast cancer mortality rate was 21.3 per 100,000 women

Cervical cancer incidence rate was 7.2 per 100,000 women

Cervical cancer mortality rate was 2.1 per 100,000 women

III. SCOPE OF SERVICES

LENGTH OF CONTRACT

The Contractor shall have an annual contract with the NC Cancer Prevention and Control Branch to provide breast and cervical screening services to NC BCCCP eligible women for up to 36 months, from June 1, 2019 through May 31, 2022 (contingent upon successful completion of performance indicators and based on funding availability).

BCCCP PROGRAM ELIGIBILITY

Women who are below 250% of the Federal Poverty Guidelines, are uninsured or underinsured, and do not have Medicare Part B or Medicaid are eligible to receive services.

A. *Priority Population*

1. The priority population for **NC BCCCP mammography services** is women who are low-income (below 250% of federal poverty level), who have not been screened in the last one to two years and:
 - a. For **federally-funded services** the priority population is between the ages of 50 and 64.
 - b. For **state-funded services** the priority population is between the ages of 40 and 64.
2. The priority population for **NC BCCCP cervical cancer screening services** is women who are low-income (below 250% of federal poverty level), who have never been screened and:
 - a. For **federally-funded services** the priority population is between the ages of 21 and 64.
 - b. For **state-funded services** the priority population is between the ages of 21 and 64.
3. The priority population for **NC BCCCP services** is individuals who are defined as disproportionately burdened populations. While all segments of society are affected by cancer, there are certain populations that are disproportionately burdened by the increased risk of cancer or by the lack of adequate healthcare options for prevention and/or treatment. Special emphasis is placed on targeting efforts to achieve health equity by recruiting women disproportionately affected by cancer, including women of ethnic minorities.

Disproportionately burdened populations may be defined by sex, race, ethnicity, disability, sexual orientation, gender identity, geographic location, or socioeconomic status. Among the populations that will benefit from this funding are those living in rural and frontier geographic areas; culturally isolated women; incarcerated or institutionalized women; medically underserved women; women from minorities defined by race, religion, ethnicity, or culture, including African Americans, Alaska Natives, American Indians, Asian Americans, Pacific Islanders and Hispanics; lesbian, gay, bisexual, or transgender individuals; and women with low literacy, non-English speaking language barriers, and disabilities.

B. Eligible Population

1. Women 21-75 years of age with gross incomes that are <250% of the federal poverty level, according to the Federal Poverty Guidelines, and who are uninsured or underinsured, may be eligible for breast and cervical services, subject to the limitations and exceptions listed below.
 - a. Women enrolled in Medicare (Part B) and/or Medicaid programs are not eligible for program-funded services.
 - b. Women receiving Family Planning (Title X of the Public Health Service Act) services are not eligible for NC BCCCP-funded services that are available through Title X funding.
2. Eligible women ages 21-39 with undiagnosed breast or cervical abnormalities may receive NC BCCCP funded diagnostic **services if no other source of healthcare reimbursement is available.**
3. Documented citizenship is not required for screening and/or diagnostic services through NC BCCCP.

FUNDING GUIDELINES AND RESTRICTIONS

1. The Contractor shall request reimbursement at a capitated rate of \$255 per woman who receives at least one NC BCCCP-funded clinical service (mammogram, clinical breast exam, Pap test, Pap test with HPV co-test, primary HPV screening or diagnostic service) for up to the total number of women specified in Performance Requirements Section I. Count each woman only once.
2. The total funds awarded from NC BCCCP shall be maintained by the Contractor in a separate budget cost center to assure proper auditing of expenditures. Funding allocations are based on performance measures as stated in the Performance Monitoring/Quality Assurance Plan Section.
3. Monies shall be allocated to ensure achievement of contracted target numbers and payment for NC BCCCP-approved services rendered by outside medical providers through subcontracts. These may include but are not limited to surgical consultations, follow-up for abnormal results, and diagnostic procedures. (Refer to the most current NC BCCCP Fee Schedule <http://bcccp.ncdhhs.gov/providers.htm>. The Contractor must hold sufficient NC BCCCP funds to complete the screening, follow-up, and/or diagnostic services for each woman served.
4. Only services listed on the NC BCCCP Fee Schedule are reimbursable with program funds.
5. The Contractor must submit Contract Expenditure Reports (CER) by the 10th of each month requesting reimbursement for services rendered in the preceding month.
6. Funds must be expended within timeframes specified in the contract.
7. NC BCCCP funds shall not be used to reimburse for treatment services. Payment to a sub-Contractor using NC BCCCP funds are limited to those screening and diagnostic follow-up services listed in the current NC BCCCP Services Fee Schedule.

PAYMENT FOR SERVICES

1. The payment to subcontractors for any service described in Section III, Scope of Services may not exceed the prevailing Medicare allowable fee for the service. Fee schedules will be provided to the participating contractor by the NC BCCCP.
2. NC BCCCP funds may only be used for payment after all other third-party payment sources (including private insurance but not Medicare [Part B] and Medicaid) provide evidence of partial or non-payment of eligible services provided by NC BCCCP. NC BCCCP is the payer of last resort.
3. Women whose gross incomes are less than or equal to 100% of the federal poverty level cannot be charged for any services covered through the NC BCCCP. Participants should be notified of any possible charges prior to committing to the procedure.
4. A flat fee cannot be charged for NC BCCCP.
5. Services to any woman enrolled in the NC BCCCP may be charged according to a sliding fee scale for women whose gross incomes are between 101% and 250% of the federal poverty level.

CONTRACT BUDGET ADJUSTMENTS

1. The number of women served in compliance with performance indicators shall be determined by the number of women that have a breast and/or cervical service paid partially or in full with NC BCCCP funds.
2. To retain the baseline budget for the following fiscal year, a NC BCCCP Contractor must screen 100% of their allocated number of women and expend 100% of the funds awarded each year.
3. NC BCCCP staff shall evaluate Contractor performance at the mid-point of each fiscal year. Those Contractors who are not meeting performance indicators shall be notified and evaluated for placement on “high risk status.” If a Corrective Action Plan (CAP) is required, the Contractor shall have 60 days to submit and implement the plan. A program staff performance review in January shall determine if budget adjustments are necessary.
 - a. A pattern of expenditures that may lead to a surplus of funds in the contract year may result in a budget increase or decrease.
 - b. Contractors exceeding their targeted numbers and complying with performance indicators may receive additional funds (if available).
 - c. Contractors who do not meet their screening targets shall be assessed for budget and patient target realignments.
4. Funding adjustments may be made in the baseline budget of Contractors. State accessible data shall be reviewed in November to determine if budget adjustments are indicated based on compliance with performance indicators and patient targets.
5. Contractors that are unable to meet realistic targets shall receive technical assistance.

A contract between the State and Contractor will be monitored for performance on a routine basis and revised if necessary.

PROGRAM COMPONENTS AND ACTIVITIES

Contractors may provide services in their own location, satellite sites or through sub-contract agreements with other Contractors. All sub-contractors must follow the same guidance for quality of services and follow-up as the original Contractor. These services are divided into primary strategies (Health Systems Changes and Provider Focused Activities, Community-Clinical Linkages to Aid Patient Support, and Environmental Approaches for Sustainable Cancer Control) and cross-cutting strategies (External Partnerships, Cancer Data and Surveillance, and Program Monitoring and Evaluation), along with Breast and Cervical Cancer Medicaid and Professional Development. Expected activities for each strategy are described in more detail below.

Health Systems Interventions and Provider Focused Activities: Contractors are expected to work at both the individual level and the population level by:

- 1) providing direct **clinical services** and support to eligible women and
- 2) working to enhance clinical service delivery among appropriate patient population through implementation of **evidence-based interventions**.

Community-Clinical Linkages to Aid Patient Support: Consists of coordination of services among health systems, communities, and public health using community-based and/or clinic-based health workers to increase access to clinical care and promote health behaviors.

Environmental Approaches for Sustainable Cancer Control: Environmental approaches promote health and support healthy behaviors in states, communities, and smaller settings such as work sites and businesses. Environmental approaches can involve one group or a group of organizations making changes in policies and physical surroundings that makes healthy choices easy, convenient, and affordable for all.

Cancer Data and Surveillance: Data should be utilized for program planning and on-going monitoring of services provided by the program. Use of data is a critical step for all primary strategies (Health System Intervention, Community-Clinical Linkages, and Environmental Approaches). Data can be highly valuable for program monitoring, program improvement, quality assurance and evaluation, as well as for communicating program efforts and successes to the public, legislators, and advocates.

Program Monitoring and Evaluation: Evaluation, or the systematic collection of information about how a program operates and its impact, is an important part of program management. A good evaluation enables you to monitor program implementation, demonstrate the success of programmatic activity in achieving outcomes, and identify areas for improvement.

Quality Assurance /Quality Improvement: Quality assurance and quality improvement (QA/QI) support the quality of clinical service delivery. QA is the process of monitoring the degree to which health services for individuals and populations increase the likelihood of desired health outcomes and are consistent with current professional knowledge. QI is the commitment and approach used

to continuously improve every process in every part of an organization, with the intent of meeting and exceeding customer expectations and outcomes.

Breast and Cervical Cancer Medicaid (BCCM): Women who are enrolled in NC BCCCP and have a breast or cervical cancer diagnosis or an eligible precancerous diagnosis, are eligible to apply for Breast and Cervical Cancer Medicaid for cancer/pre-cancer treatment and/or reconstruction costs if they meet additional eligibility criteria.

Professional Development: Includes clinical education and program updates for health care contractors and health care professionals.

CLINICAL PROTOCOLS / PERFORMANCE STANDARDS

The Contractor shall adhere to the following:

A. Breast Screening

1. Protocols for breast screening and follow-up shall be in accordance with the *Breast Screening Manual: A Guide for Health Departments and Providers* (DHHS, December 2016).
2. All eligible women shall receive breast cancer screening services (clinical breast exam and age-appropriate mammogram) based on the guidelines under Chapter I of the Breast and Cervical Screening Manual. The vertical strip method is endorsed.
3. **At least 75% of all initial mammograms** provided through NC BCCCP using **federal funds must be for women ages 50 to 64**; no more than 25% may be provided for symptomatic women under the age of 50.
4. Symptomatic women under the age of 50 — NC BCCCP funds can be used to reimburse for Clinical Breast Exams (CBE) for symptomatic women under the age of 50. If the findings of the CBE are considered to be abnormal, including a discrete mass, nipple discharge, and skin or nipple changes, a woman can be provided a diagnostic mammogram and a referral for a surgical consultation.
5. Asymptomatic women ages 40 to 49 — NC BCCCP State funds may be used to reimburse for mammograms for women ages 40 to 49. NC BCCCP Federal funds may only be used for mammograms in this population for women who are symptomatic, subject to the 25% limitation noted above.
6. Asymptomatic women under the age of 40 — NC BCCCP funds can be used to screen asymptomatic women under the age of 40, if they are considered to be at high risk (see high risk defined below) for breast cancer.
7. Asymptomatic or symptomatic women age 65 to 75 – NC BCCCP State funds may be used to reimburse for mammograms for women ages 65 to 75 if no other source of funding is available. The NC BCCCP Federal funds may be used for symptomatic women in this population.
8. All women should undergo a risk assessment to determine if they are at high risk for breast cancer. NC BCCCP funds can be used for annual screening among women who are

considered high risk for breast cancer. “Women at high risk” includes those who have a known genetic mutation such as BRCA 1 or 2, first-degree relatives with premenopausal breast cancer or known genetic mutations, a history of radiation treatment to the chest area before the age of 30 (typically for Hodgkin’s Lymphoma), and a lifetime risk of 20% or more for development of breast cancer based on risk assessment models that are largely dependent on family history. These women should be screened with both an annual mammogram and an annual breast MRI.

B. Cervical Screening

1. Protocols for cervical screening and follow-up shall be in accordance with *Pap Screening Manual: A Guide for Health Departments and Providers* (DHHS, September 2013), a component of the *Breast and Cervical Screening Manual: A Guide for Health Departments and Providers*. (DHHS, December 2016).
2. Cervical Services. At least 20% of all enrolled women screened for cervical cancer shall meet the definition of never screened (greater than 10 years). The priority age for cervical cancer screening is women between the ages of 21 and 64.
3. For patients with no abnormal findings, the screening interval for Pap testing is every three years. For women age 30-65, the patient may opt for co-testing with Pap test and HPV test or HPV test alone every five years.
4. NC BCCCP funds cannot be used for cervical cancer screening in women with total hysterectomies (i.e. those without a cervix), unless the hysterectomy was performed because of cervical neoplasia or invasive cervical cancer, or if it was not possible to document the absence of neoplasia or reason for the hysterectomy. (A one-time pelvic exam is permitted to determine if a woman has a cervix.)
5. Women who have had a total hysterectomy for Cervical Intraepithelial Neoplasia (CIN) disease should undergo cervical cancer screening for 20 years even if it goes past the age of 65.
6. Women who have had cervical cancer should continue screening indefinitely as long as they are in reasonable health.
7. Women who had a supracervical hysterectomy remain eligible for Pap tests.
8. With the exception of item 4 above, a pelvic exam should not be provided using NC BCCCP funds in the absence of a Pap test.
9. All women should undergo a risk assessment to determine if they are at high risk for cervical cancer. NC BCCCP funds can be used for annual screening among women who are considered high risk for cervical cancer. Women who are at high risk for cervical cancer need to be screened more frequently than average-risk women. This includes women with HIV infection, who have had an organ transplantation, who may be immunocompromised from another health condition, or who had DES exposure in utero.

C. Tobacco Screening and Cessation

The Contractor is required to assess the smoking status of every woman screened by NC BCCCP and refer those who smoke to a tobacco cessation program such as QuitlineNC.

D. Colorectal Cancer Screening Status

The Contractor shall assess each patient age 50 and above for her colorectal cancer screening status. (See NC BCCCP Colorectal Cancer Screening Information and Assessment Policy, effective May 29, 2015.)

E. Insurance Status

The Contractor shall assess all women seeking to be enrolled in NC BCCCP for insurance status at each visit. Uninsured women must be referred to available insurance options, such as the Health Insurance Marketplace (i.e., HealthCare.gov). If the woman's visit does not occur during open enrollment, she must be provided information about how to enroll at the next opportunity.

F. Follow Up and Patient Navigation

1. Patient Navigation is defined as, "Individualized assistance offered to clients to help overcome health care system barriers and facilitate timely access to high-quality screening and diagnostics as well as initiation of treatment services for women who are diagnosed with cancer."
2. Contractors should establish services: to assist women eligible for NC BCCCP-paid clinical services in overcoming barriers to complete screening, diagnostic services, and initiation of cancer treatment; and to support low-income women (the priority populations) but who have other payment sources (e.g., state funds, Medicaid) for screening in overcoming barriers to complete screening, diagnostics, and initiation of cancer treatment.
3. Patient navigation for women served by the NC BCCCP must include the following activities: Assessment of individual patient barriers to cancer screening, diagnostic services, and initiation of cancer treatment; Patient education and support; Resolution of patient barriers (e.g., transportation, translation services); Patient tracking and follow-up to monitor patient progress in completing screening, diagnostic testing, and initiating cancer treatment; **A minimum of two**, but preferably more, contacts with the patient, due to the centrality of the patient-navigator relationship; and Collection of data to evaluate the primary outcomes of -- cancer screening and/or diagnostic testing, final diagnosis, and treatment initiation if needed.
4. When follow-up services are required, the Contractor shall use previously received NC BCCCP funds to pay for or provide the diagnostic services listed on the most current NC BCCCP Fee Schedule up to a maximum of \$2,000 per woman. All fee schedules are sent via email to BCCCP navigators and are found at <http://bcccp.ncdhhs.gov/providers.htm>. The Contractor must hold sufficient NC BCCCP funds to complete the screening, follow-up, and/or diagnostic services for each woman served.
5. The Contractor shall assure that a referral system for the diagnosis and treatment of all abnormal findings is in place. The Contractor shall designate a primary person who shall be responsible for implementing a protocol that ensures all patients receive follow-up services or medical treatment when required. Cross training is strongly encouraged. Follow-up of an

abnormal screening test must be completed within 60 days of the patient's screening visit for breast screening and within 90 days for cervical screening.

6. Women having an abnormal breast or cervical screening result shall be referred for assessment of the following findings:
 - a. Clinical breast exam results of discrete palpable mass, serous or bloody nipple discharge, nipple areolar scaliness, or skin dimpling or retraction;
 - b. Mammogram result of Category IV (suspicious abnormality, biopsy should be considered) or Category V (highly suggestive of malignancy); and
 - c. Pap result of Low-Grade Squamous Intraepithelial Lesions (LSIL), Atypical Cells of Undetermined Significance (ASC-US), with positive Human Papilloma Virus (HPV), Atypical Squamous Cells Cannot Exclude High-Grade Lesions (ASC-H), High-Grade Squamous Intraepithelial Lesions (HSIL), Squamous Cell Carcinoma (SCC), Abnormal Glandular Cells (AGC) including Atypical Glandular Cells of Undetermined Significance (AGUS) or adenocarcinoma.
7. At least three attempts must be made to locate and inform the patient of **abnormal screening results**. The last attempt must be by certified letter. Written documentation of all attempts must be included in the medical record.
8. For all abnormal mammograms, clinical breast examinations, and Pap test results, the following information shall be documented in the patient's medical record:
 - a. Patient contact information (number and date of attempts made to follow-up);
 - b. Follow-up appointment information (date, follow-up provider and follow-up location);
 - c. Date referral was made; and
 - d. Results of all referrals, including the report from the provider.
9. Standing Orders
 - a. All standing orders or protocols developed for nurses in support of this program must be written in the North Carolina Board of Nursing format. All local provider agencies shall have a policy in place that supports nurses working under standing orders. <http://www.ncbon.com/vdownloads/position-statements-decision-trees/standing-orders.pdf>.

G. Implementation of Evidence-based Interventions (EBIs)

1. Contractors should work to increase the overall number of women screened, improving clinic-level breast and cervical cancer screening rates, and strengthen the delivery of cancer screening services. To do this, NC BCCCP will partner with Contractors to conduct a comprehensive assessment of the Contractor's health care delivery system. The assessment will include breast and cervical cancer screening rates, data/electronic health record (EHR) functionality, patient/health system process flow, policies/standing orders for cancer screening, provider/health system adherence to clinical cancer screening guidelines, /community health worker/support services and use of EBIs or other strategies that support cancer screening. NC BCCCP, in partnership with the Contractor health care system, will use these data to identify priority populations and to identify appropriate interventions for implementation.

2. *The Community Guide* serves as a resource to help select interventions to improve health and prevent disease in your community, community organization, or healthcare organization. The descriptions of EBIs recommended for increasing breast and/or cervical cancer screening can be found at <https://www.thecommunityguide.org/topic/cancer>.

H. Community-Clinical Linkages

1. To enhance internal Contractor referrals to NC BCCCP, the Contractor shall provide in-reach activities to ensure that Contractor clinics and personnel are aware of NC BCCCP eligibility guidelines and the appropriate contact person and to refer a potentially eligible patient to the appropriate contact person.
2. The Contractor shall conduct appropriate Recruitment and Outreach strategies to reach women who have never been screened for breast and cervical cancer as well as populations who are most at risk.
3. The Contractor may use community-based and/or clinic-based health workers/lay advisors, native language speakers, or health educators for community outreach to identify women for screening, provide patient education about risk factors and preventive health behaviors, and address barriers to care. The ultimate goal is to link women to community resources, medical homes, or health care systems/clinics for cancer screening, diagnostic, genomics, and/or treatment resources.

The Contractor shall return all recruitment data and surveys by the required deadline as requested by the NC BCCCP program consultant.

I. Environmental Approaches

1. The Contractor will use available data sources to identify priority communities. This will require engaging community partners such as cancer coalitions and community champions. The focus is to educate and inform employers and community-based organizations in priority communities about ways to help increase breast and cervical cancer screening rates among low-income women by making screening services accessible and facilitating healthy lifestyles that reduce cancer risk. The goal is to have employer and organizational policies in place that increase access to screening and improve health behaviors.
2. The Contractor will track policies developed and outcomes of having these policies in place.

J. Professional Development

1. The Contractor shall participate in educational opportunities provided or recommended by NC BCCCP as appropriate.
2. The Contractor's NC BCCCP staff must attend:
 - a. The NC BCCCP Biennial Update Meeting

Outcomes:

Individual service goals are set with each Contractor based on capacity, prior service targets, successful outcome results in compliance with CDC performance indicators, and continued NC BCCCP funding.

Screening and subsequent diagnostic services, and treatment if needed are expected to: reduce mortality and morbidity due to breast and cervical cancers in NC women; increase early detection of breast and cervical cancer among high-risk, under-served women; expand community-based breast and cervical cancer screening and diagnostic services to low income, medically under-served women; and ensure access to medically appropriate services for women diagnosed with cancer or pre-cancer.

Service Quality:

All Contractors of the NC BCCCP shall use evidenced-based program guidance to meet contract requirements. All Contractors shall be held to standards for accomplishment of performance indicators and number of women contracted to be served. Inability to meet set program performance targets or adherence to procedures/protocols could result in the Contractor being subject to loss of NC BCCCP funds. The performance indicators to be met are announced in this contract to assure that the minimum goals to be attained for the year are outlined.

Precise deliverables of this contract are listed in the table below. The target number is the minimum required number of women served. Exceeding this number is encouraged based on funding resources. The women served in NC BCCCP may receive either breast or cervical services or both.

NC BCCCP PROGRAM RESPONSIBILITIES FOR MONITORING

NC BCCCP Program staff will conduct a risk assessment of the contractor and risk categories will be determined prior to the release of this contract and reassessed at least annually. Each contractor will be categorized as low or high risk. A contractor's risk category can change at any time and will be reassessed if irregularities are noted. The frequency and intensity of monitoring techniques applied will be directly proportional to the level of risk assigned. A contractor categorized as low risk will receive a detailed monitoring event approximately every three years. A contractor categorized as high risk will be notified by letter of the high-risk assessment and a specific date for corrective action and details about the monitoring plan will be defined in the letter. For contractors categorized as high risk, the monitoring event will occur at least annually.

1. The purpose of the monitoring event is to verify and document timeliness and adequacy of follow-up, quality of services, efficiency of operations, and compliance with program requirements.
2. The monitoring event will be conducted on-site at the Contractor's facility if possible. Alternatively, a remote monitoring event may be conducted if travel to the Contractor's site is not possible.

5. NC BCCCP staff will provide the Contractor with more frequent technical assistance if there are indications of problems meeting performance requirements or if requested by the Contractor.

CONSEQUENCES OF INADEQUATE PERFORMANCE

1. Failure to meet targets or expend funds as expected may result in reduced targets and funding.
2. If monthly or triennial monitoring uncovers deficits, NC BCCCP staff will work with the Contractor to correct these deficits.
 - a. Ongoing deficits will require development and implementation of a Corrective Action Plan

- b. Persistent failure to meet program requirements will result in termination of the Contract.
3. Contractors that terminate or are terminated from the NC BCCCP Program are required to:
 - a. Notify the NC BCCCP Program Director in writing and signed by the Contractor's Executive Director on their letterhead of the intent to terminate, including the effective date.
 - b. Identify resources in the community and refer women who have abnormal findings found prior to termination of the NC BCCCP Program
 - c. Notify all current NC BCCCP participants of closure of the program and offer them assistance to find alternative providers of screening services.
 - d. Continue to monitor monthly data reports and provide follow up or corrected information until all cases are closed out.
 - e. Maintain all NC BCCCP records and program manuals according to the local record retention schedule.
4. With termination, all remaining NC BCCCP funds will revert to DPH.
5. A midyear assessment of the Contractor shall be done. As Contractors are self-eliminated due to not meeting program expectations, their funding shall be reduced and shifted to other Contractors in good standing.
6. As funds are changed from one Contractor to another, projected screening numbers for services shall also be adjusted.
7. Contractors that lose NC BCCCP funding should identify resources for follow up of women with abnormal findings in their communities within 30 days from the date of agreement termination.

This is not intended to preclude bona-fide Organization fund raising-activities.

B.
